

Shrink Wrap Pro™

Do you have you a problem like:

- Needing to protect non-standard or irregular loads on their journey to your customer?
- Running out of covered storage space?
- Needing a temporary work shelter for a job?
- Needing to encapsulate an area during grit blasting or need to protect sensitive equipment during renovations?

Shrink Wrap Pro™ uses marine grade shrink wrap with 4 year UV inhibitors and anti-brittle agents to wrap any size and shape of equipment. This versatile material will only adhere to itself and not the equipment being wrapped. It will protect goods and equipment outside for years.

A shrink wrap cover is a great way to protect large items because it is heat shrunk. This means it moulds to the object it is protecting, becoming 'tight as a drum skin' and so it cannot flap or chafe, even at high wind speeds. This tightness is the secret of the strength and durability of shrink wrap.

Here are some examples of projects Shrink Wrap Pro™ has carried out over the years:

A radar tower in shannon 16 metres high and 12 metres square was encapsulated in February 2011 for grit blasting and painting.

Portumna Bridge was encapsulated from October 2010 to May 2011 for grit blasting and painting. The work was completed in 6 sections with access towers between.

A workshelter to house a 70ft 1930's steel trawler being converted into a luxury yacht in Howth from November 2007 to May 2008.

The completed luxury yacht.

A 70ft steel hull yacht encapsulated for shot blasting (copper) and painting of the hull below the water line. Completed in Howth 2008.

The roof and scaffold shrink wrapped during conversion of a bungalow to a dormer bungalow. The roof was raised 6 feet during the conversion. Conversion carried out in Malahide from September 2009 to April 2010.

Workshelter for building a two story 3000 square foot self-build house at Gortnabinnny 5 miles from Kenmare. Covered from March to July 2011.

The interior of the workshelter showing work in progress.

An existing garage was demolished and a two story extension added to the house. The existing roof was modified to incorporate the new extension. The family continued to live in the house during the conversion. Cabra, November 2009.

A single story wing of a house converted into two stories. Existing roof on main building modified to incorporate extension. Foxrock, October 2010.

Keenan Systems feeder wrapped prior to shipping on a flat-rack from Carlow to the USA.

Interceptor 48 Pilot boat wrapped prior to shipping from Cork to Malta as deck cargo.

A pressure vessel on a flat-rack for shipping from Charleville to China.

Another Interceptor 48 Pilot boat wrapped prior to shipping from Cork to Malta as deck cargo.

Gas cooling towers wrapped for storage at Ellesmere Port near Liverpool.

A bowroof shed constructed and shrinkwrapped for repairs and maintenance of a 28ft motor boat.

Aircraft engine housings wrapped for storage.

A steel frame cage for transporting aircraft wings from Bombardier in Belfast to Bombardier in Canada by road and sea.

Finally some fun,

Shrink Wrap Pro™ gives you
WINGS !

Shrink Wrap Pro™ supplied
shrink film to cover the wings of
the winner and runner up of the
RedBull Flutag held in
Dunlaoghaire Co. Dublin 2011.

Here is the winning flight of Cool
Flying.

Shrink Wrap Pro™ provides an on-site shrink wrap service to the marine, civil engineering, industrial and domestic markets. Size is not a problem as sheets of shrink wrap can be welded together to cover objects of any size.

The applications for shrink-wrap coverings are limited only by the imagination. If you have an application idea or requirement then please contact Shrink Wrap Pro™ and we will be happy to discuss your requirement and give you a quote.

Shrink Wrap Pro™ also supplies shrink film, materials and equipment for those wishing to carry out shrink wrapping. Training is available and can be carried out at your premises or at Shrink Wrap Pro™.
